WORK EXPERIENCE

August 2020-Current

Software & Tech Consultant

🏢 Robert Gardner Wellness
📍 United States

Web work, app development, and analysis of software & hardware, as well as consultant.

Excellent person to talk to and work with. His ability to communicate is versatile and my own is tactile in comparison. He makes me look like a sucker with better communication skills and makes me trollishly jealous (a feather tickling ones chin).

Once you figure out how and what he's trying to do and say, everything sort of falls into place. I've known him for 11+ years, and every interaction was trollish, neebish, and two goofy nerds poking at each others' heads asking "hey man, why you that". And always a pleasure to do business with.

One may get a little annoyed but I can't think of a person who isn't annoying to someone. And the way he accepts his flaws and shows it stands out in a way he might not fully acknowledge or if he does it is done silently.

September 2022-January 2023

Kitchen Staff

🏢 Chokdee Thai Cuisine
📍 Manor, Texas, United States

Basic work; cook, clean, bus tables when needed, mop the floors, take out the trash, and dump grease into the grease trap by the dumpster.

Great place to work for a first job if it is your first job. Recommended over working at pizzahut, hands down. They're an understanding and very polite people to work with.

January 2022-May 2022

Customer Services Representative

🏢 Pizzahut
📍 Manor, Texas, United States

Customer service representative job; wrongful termination by manager; cannot recommend people work for said manager & employer after how they were passive aggressive & outright condescending to the point of being blatantly insulting with word usage.

The manager there can't seem to take responsibility for their actions and will not accept any form of pushback, formalities all.

Most of the interactions are half premeditated and not well lied about or papered over. Even their call to police and false reports filed by them are simply not worth your time.

I would recommend looking for other employers if nothing else. They messed up that bad on top of not fully reading the contract they signed and violated the terms of. And I can't recommend that to people; Passive aggression in any work place environment can affect people negatively.

August 2016-April 2017

Warehouse associate

🏢 Leif Johnson Ford (Parts Department)
📍 United States

Pull parts, scan them, update inventory, and tag them for shipping.

Any mistake made can be used against you. Sneezing at an awkward time to sneeze can be safely said to be usable as a reason for them to try to get you to agree to sign their right off saying "I warned ya". The target is usually a person they expect to be able to easily disadvantage.

Work for any other employer besides this one as it will get taken out on you.

EDUCATION

2014-2016

Programming/CompSci

🏫 Chaparral Star Academy
📍 Pflugerville, Texas, United States

It's an okay school but the principle and Mr. Thompson are a few people who play off of interpersonal deficits in a socially negative way. Most people don't notice because of how they hide it. And the problem is that they look to make a bad example out of people with a unique interpersonal deficit so it seems like an anger issue or that said student was "intimidating".

They're not the only people like that at that school. But, on the whole, they tend to abuse their point of authority.

SKILLS

Docker Linux Containerization Kanban python java C++ assembly html
CSS (Cascading Style Sheet) kubernetes Node.js flask flask-sockets sockets.io.js

CPPYY module for python
